

I benefit from listening to XM Satellite Radio and its traffic and weather channels. This excellent service makes it easier for me to plan my trip to and from work every day and therefore enables me to spend more time with my family and less time tied up in traffic.

Satellite radio provides a variety and quality of news (such as the BBC, and CNN), information and music that are not available elsewhere. I pay for these services and am not happy to hear the National Association of Broadcasters dictating what I am permitted to hear.

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming I deserve and for which I pay a lot of money to listen to.
